Forecast for Monday 03 Jul 2023

Weather: A bright start. Cloud soon increases from the west, with an area of rain and blustery showers pushing across the park this morning, heavy and possibly thundery in nature. Showery rain clearing to a brighter afternoon, however, still seeing some well scattered showers. Further rain arriving from the west towards midnight, persisting overnight.

Chance of cloud-free hill tops above 600m: 80%, falling to 40% from the west in morning rain or showers. 60% towards midnight.

Low cloud and visibility: Some early cloud may briefly cover some of the higher peaks. Cloud soon lowering and thickening from the west, with bases of 400-500m extensively and especially around heavier showers. Clearer during the afternoon with bases in showers likely remaining above tops. Cloud with bases around 500m arriving from the west towards midnight, but this is low confidence. Visibility very good, but dropping frequently to poor in rain and showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts in excess of 40mph, especially in and around any heavy showers, will make for fairly arduous walking, particularly across exposed or elevated routes and east of major ridges. Unseasonably chilly at height, feeling close to freezing. Heavy showers may also makes paths slippery, with some localised flooding possible.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 04 Jul 2023

Weather: Cloudy and unsettled on Tuesday with a spell of more persistent rain during the morning. This is expected to ease and clear to the east by early afternoon. Sunny spells and scattered showers follow, showers may turn heavy at times. Further band of organised or showery rain arrives from the south and west overnight.

Maximum wind: West 15-25 mph, with gusts of 25-35 mph, mainly during the afternoon.

Chance of cloud-free hill tops 600m: 50% increasing to 80% by the afternoon. Decreasing to 60% late evening.

Low cloud and visibility: Low cloud with bases around 300-400m expected in association with morning showery rain. Bases will lift and break as rain clears away, with cloud above summits by midday. Cloud may then lower and thicken late evening, with bases around 400-500m. Generally good visibility, but poor in showers or heavy rain.

Temperature: **Valleys:** Plus 10 Celsius rising to plus 18 Celsius.
At 600m: Plus 6 Celsius rising to plus 11 Celsius.
Freezing level: Above all summits.
